

I am a Social worker for Shasta County and have a very stressfull job and I use KLOVE radio station to calm me and center me every day. I also use it as a tool to connect the population I work with. My clients are addicts and alcoholics in recovery and they need all the posative reenforcement I can find and K-love helps give hope to my clients and myself. We need more K-love radio stations not less by any means. Our children need to grow up with morals, they need to know that there are good people out there and K-LOVE does all that.
